

Geric Holdings World Patented T8 Tube Lights & Warranty

Geric Holdings world patented T8 tube lights Description:

A Geric Holdings patented T8 tube is superior to any other T8 tube light due to its patented tube awarded in South Africa, Europe, USA and China. This patent allows for **maximum possible heat transfer** between the LED strip and the aluminium housing of the light allowing for transverse fitting of the LED strip allowing for a 100% head paste coverage between the LED strip and the aluminium tube. This is impossible to achieve with traditional T8 tube lights where the LED strip slides in lengthwise with a typically only between 10% and 20% coverage of the heat paste between the LED strip and the aluminium housing. Some T8 tube lights do not even have any heat paste applied.

Why this is important:

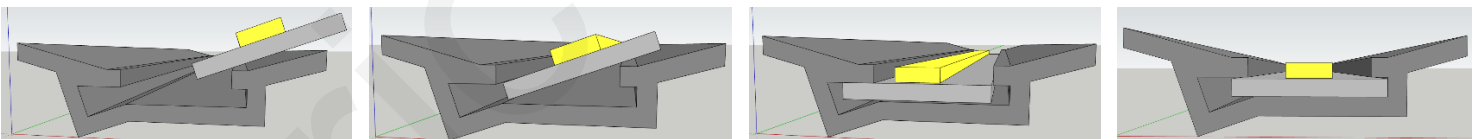

This is important since the 100% head paste coverage between the LED strip and the aluminium tube allows the LED's of the light to operate at the lowest possible temperature resulting in;

- 1 higher efficiency (more light for the same power), and
- 2 a longer lifespan.

Patented tube:

Transverse fitting steps of the LED strip into the aluminium tube slot receiving the LED strip:

Geric Holdings world patented T8 tube lights warranty:

- 1 All Geric Holdings patented T8 tube lights carry a **3-year full replacement warranty**.
- 2 In addition a Geric Holdings patented T8 tube light also carries an **EXTENDED REPLACEMENT WARRANTY FOR DOMESTIC USE** with the following conditions:
If the light is used in a domestic setting and fails at any time after the **3-year full replacement warranty** has expired, a new tube light can be purchased at **HALF THE PRESENT PRICE** on condition the old faulty light is returned untampered with and the aluminium tubing is not physically damaged. This light again carries a **3-year full replacement warranty!**
